

“Geesh!... Here we go again!!”

***How often do you hear this
from your audience?***

Creating the Dynamite Multimedia Experience.

Technology can be a great way to enhance your presentations, but you can get too much of a good thing... Don't let the technology get in the way of you or your message! You will learn:

- Ways to **“get and keep their attention”** and get them excited about your message
- How to watch out for the **“Flash and Trash”** – the audience can get so caught up in the multimedia “WOW” that they can miss the points you are trying to make.
- How to **take control of your environment** – the setting has everything to do with how receptive your audience will be to your message. You have a great message and a great delivery, but if they are not ready, no one will hear.
- How to **deliver a POWERFUL, unforgettable performance** – you have an important message to give, you spent hours crafting the right words... now make sure they GET IT
- Ways for your audience to **take you home with them** – handouts and take-away products that are remembered and treasured

The competition is not waiting for you...

Will you lead or follow?

Excellent, entertaining & insightful...

- Tom Mason, Cornhusker State Industries
